

POSITION TITLE : Steel Welder

Full time

10, rue Émilien-Marcoux, Blainville

Day shift

WHO WE ARE

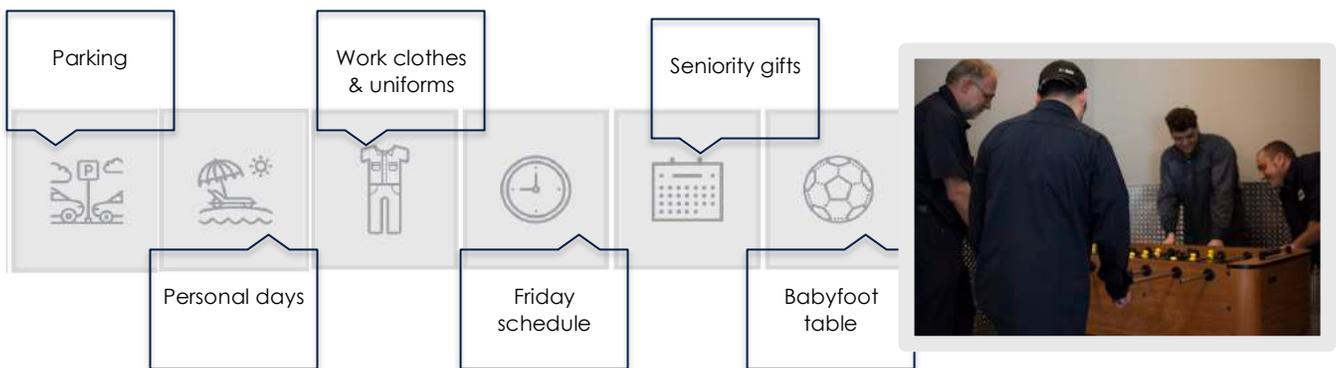

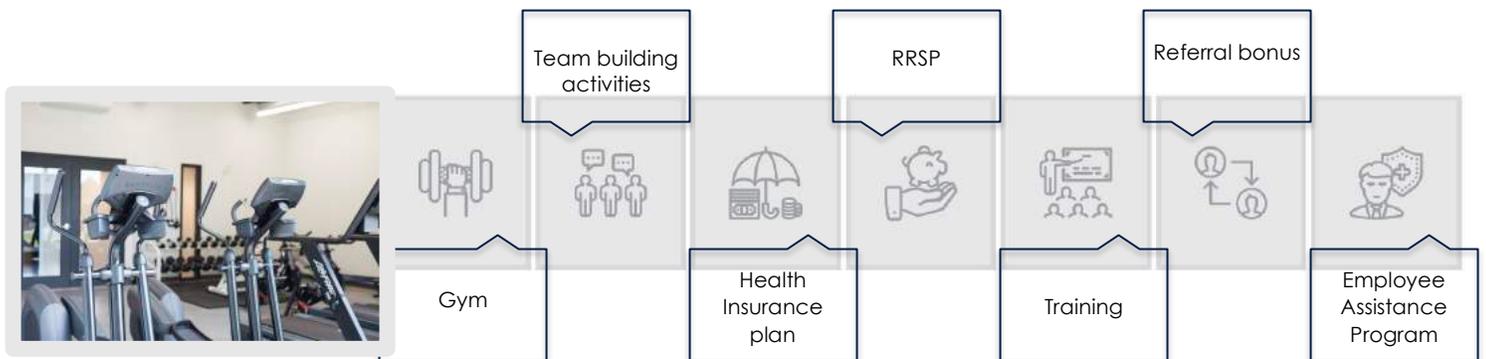

- ✓ We are a dynamic company located in modern and bright premises.
- ✓ The world leader in the manufacture of emergency towers which are used in over 50 countries to help restore power on power lines damaged by natural disasters.
- ✓ A manufacturer of aluminum industrial structures for the North American market.
- ✓ A company that believes in the importance of aluminum as a strategic and more eco-friendly resource than steel and works to make its advantages known in various fields of application.
- ✓ A company that believes in a balance between work and family time, and has been officially rewarded for these initiatives.
- ✓ A company that respects its employees and looks to help them in their development and their search for stimulating challenges.
- ✓ A company that supports and believes in the importance of education for its employees.
- ✓ Passionate, committed, honest employees who perform great when collaborating together. We share a strong belief in the synergy generated by several brains working together.

WHAT WE ASK FROM YOU

- ✓ Support the production during everyday operations, but also when new projects arise.
- ✓ For you to be aware for the best welding techniques

WHAT YOU COULD ENJOY

WHO YOU ARE

- ✓ You have a professional diploma in welding-assembly.
- ✓ You have three years of experience in steel welding.
- ✓ You have a good knowledge of the SMAW, GMAW and FCAW processes.
- ✓ You know the symbols and welding procedures of the BSC (CWB).
- ✓ You have a good understanding of the reaction that occurs with metals when they face hot and cold temperatures.
- ✓ You have ease with techniques used to immobilize the gear.
- ✓ You are comfortable welding in all positions.
- ✓ You are meticulous and have a good manual dexterity.
- ✓ You are able to produce at a predefined rate.
- ✓ Health and safety rules are always on your mind when using welding equipment.

YOUR TASKS

- ✓ Read assembly plans and specifications.
- ✓ Use the appropriate welding methods according to the requests on each plan.
- ✓ Prepare assembly and welding work while keeping in mind several important factors, including: metal properties, the effects of heat and cold, condensation, tolerances, expansion, contraction of metals, etc.

- ✓ Assemble the parts using welding points at various specific marks before beginning final welding steps.
- ✓ Adjust the welding equipment according to the tasks that are handed off to you.
- ✓ Evaluate if each part meets the assembly tolerances and make the necessary corrections when they are required.
- ✓ Identify any anomalies: porosity, gutters, overflow, etc.
- ✓ Work-out at the gym, participate in several group activities, push us out of our comfort zone. Enjoying your time at work is important to us!
